Index to Vol. 12, 1978 and Vol. 13, 1979

Vol. 12, No. 1

1 **The Role of Advanced Transit in the Implementation of the Polycentric City Concept**
Jerry B. Schneider and Tomoki Noguchi
University of Washington

23 **Directional Control and Stability of CVS Passenger Vehicles**
Masakazu Iguchi, *Tokyo University*
Takanori Minami, *Toyo Kogyo Co., Ltd.*

41 **Analytical Stochastic Modelling for the Control of Intersections in Automated Guideway Systems**
S. L. Strong and A. L. Kornhauser, *Princeton University*

77 **Travel Time Variability on Commuter Journeys**
A. J. Richardson, *Cornell University and Monash University*
M. A. P. Taylor, *CSIRO Highett, Victoria, Australia*

101 **The German Research and Technology Program Concerning Advanced Tracked Ground-Transportation Systems**
Helmut Schulz, *Federal Ministry of Research and Technology, West Germany*

Vol. 12, No. 2

1 **The Effects of Changes in Fuel Prices, Bus Fares, and Parking Fees on the Journey to Campus**
Thomas M. Corsi, *University of Maryland*
Milton E. Harvey, *Kent State University*

15 **AGT Travel Demand Analysis**
Frederick C. Dunbar and Ricardo deP. Dobson
Charles River Associates, Inc.
William R. Eager, *Transportation Development Associates, Inc.*
Michael Fanning, *Boeing Computer Services, Inc.*
W. David Osmer, *Boeing Aerospace Company*

35 **State-of-the-Art of Longitudinal Control of Automated Guideway Transit Vehicles**
W. L. Garrard, *University of Minnesota*
R.J. Caudill and A.L. Kornhauser, *Princeton University*
D. MacKinnon, *U.S. Department of Transportation*
S.J. Brown, *Johns Hopkins University*

69 **Safety Requirements for Automated Guideway Transit Systems**
Part I: Necessity, Fundamentals and Objectives
Herman Zemlin and Horst Dauper,
SNC Studiengesellschaft Nahverkehr
Part II: Conception of Safety Realization Principles
Hans Fricke and Gerhard-Helge Schildt, *Technische Universitat*

93 **Performance of an Automated-Mixed-Traffic-Vehicle (AMTV) System**
Ted K. Peng and Kilnam Chon, *Jet Propulsion Laboratory*

Vol. 12, No. 3

1 **Application of Kinetic Energy Storage to Transportation Systems**
L.J. Lawson, *AiResearch Manufacturing Co., California*

29 **The Influence of Systems and Operations on Rapid Rail Energy Utilization**
H. Lee Tucker, Jr., *U.S. Department of Transportation*

45 **Bus Priority System Studies**
Panos G. Michalopoulos, *University of Minnesota*

73 **Evaluation of the Ride Quality in Vehicles and a Suggestion for an International Parameter for Urban Transport**
Kaus Becker, *Demag Fordertechnik, West Germany*

87 **Dynamic Entrainment of Automated Guideway Transit Vehicles**
Steven E. Shladover, *Massachusetts Institute of Technology*

Vol. 13, No. 1

1 **Transportation Investment Requirements and Growth Patterns in Michigan**
William C. Taylor, *Michigan State University*
Frank X. McKelvey, *Michigan State University*
James M. Witkowski, *Michigan State University*

19 **Recent Transport Policy Initiatives in Canada: A New Role for the Government**
Ata M. Khan, *Carleton University, Ottawa, Canada*

39 **Attitudes and Urban Travel Behavior: A Case Study in Trenton, New Jersey**
Alain L. Kornhauser, *Princeton University Transportation Program*
Linda S. Hunkins, *Princeton University*

67 **Land Use Impacts of Fixed Guideway Transit Systems: Implications for Downtown People Mover Projects**
Barbara A. Zumwalt, *MITRE Corporation, Virginia*

81 **A Note on Comparisons of Cost Effectiveness in Automated Guideway Transit Systems**
J. E. Anderson, *University of Minnesota*

Vol. 13, No. 2

1 **Improving the Intercity Bus Through Transportation Systems Management**
John Morrall, *University of Calgary, Alberta, Canada*
John Mayne, *Office of the Comptroller General, Ottawa, Canada*

19 **A Method of Deciding the Optimal Specifications of Transit Systems**
Takemochi Ishii, *University of Tokyo, Tokyo, Japan*
Yoshio Tsukio, *Nagoya University, Nagoya, Japan*

45 **Simulation Modeling of Intermodal Facilities in the Design Process**
Jerome M. Lutin, *Princeton University, New Jersey*
Gregory P. Benz, *Port Authority of New York and New Jersey*

65 **Automated Guideway Transit Socio-Economic Research Program: Issues and Early Findings**
Howard D. Evoy, *Urban Mass Transit Administration, Washington, D.C.*
Barbara A. Zumwalt, *MITRE Corporation, Virginia*

85 **Objective Methodology and Logic of the Feasibility Study for the H-Bahn in Erlangen**
Gottfried Ilgmann, *SNV Studiengesellschaft Nahverkehr mbH, Hamburg, Germany*

95 **Travel Time Evaluation**
Seshagiri Rao Vemuri, *University of Northern Iowa*

Vol. 13, No. 3

1 **Guidelines for Public Transit Planning for U.S. Metropolitan Areas in the Decade of the 1980s**
Jarold A. Kieffer, *Fairfax, Virginia*

17 **Energy Conservation—Aerodynamic Drag Reduction of Intercity Buses**
N. L. Nihan, *University of Washington, Seattle, Washington*
M. C. Sullivan, *Boeing Commercial Airplane Co. and University of Washington, Seattle, Washington*

25 **Cost Effective Automated Guideway Transit in the Central City**
J. Edward Anderson, *University of Minnesota, Minneapolis, Minnesota*

41 **Material Optimization in a Torsional Guideway Transit System**
C. W. de Silva, *Carnegie-Mellon University, Pittsburgh, Pennsylvania*
D. N. Wormley, *Massachusetts Institute of Technology, Cambridge, Massachusetts*

61 **Elimination of Pressure Transients on a Single Train in a Railway Tunnel**
A. E. Vardy, *University of Dundee, Dundee, U.K.*

85 **Applications of Simulation Models to the Design of Downtown People Mover Stations**

Gregory P. Benz, *Port Authority of New York and New Jersey, New York, New York*

Jerome M. Lutin, *Princeton University, Princeton, New Jersey*
